Equipment Breakdown Coverage

Superior protection for your modern home appliances?

Simply, yes.

Replacing today's sophisticated home appliances and equipment can be expensive. But with our new optional coverage, we can help protect you against unexpected repair or replacement costs for a wide range of equipment due to an electrical, mechanical or pressure systems breakdown.

We've got you covered

Here are just a few examples of what Equipment Breakdown can cover:

- A power surge damages an air conditioning system's compressor, control board and fan motor, making a system replacement most cost effective.

Personal Insurance

- A utility transformer failure causes a power surge, damaging the home's security system and requiring a new control board.
- During a family vacation, a storm caused a power outage while a laptop and cell phone were charging. When power was restored, a voltage spike damages the items beyond repair and requires their replacement. With Equipment Breakdown, off-premises equipment would be covered.
- A boiler's low water cut-off floats become stuck, allowing the boiler to operate without water. The boiler overheats and cracks multiple cast-iron sections. The boiler is a total loss and requires full replacement.

Alternative to a warranty

Most home warranties usually require you to use their repair network. As an Equipment Breakdown policyholder, you can choose how your equipment is repaired. Best yet, the cost for this important coverage is only a few dollars a month.

Adding coverage is easy

Contact your Independent Agent today to add Equipment Breakdown to your Kemper Prime HomeSM policy.

Kemper Prime Advantage?

Simply, yes.
